### From the Presidents Mic!

### QST! QST! de WA4ZXV, Norm Schklar

Weather is warm, the ARRL has started sending propaganda, so it must be time to start preparing for FIELD DAY. GARS FIELD DAY is one my favorite events. It's a lot of fun, we get a few hours to play radio, we have some great food, we see some faces we haven't seen in a while, and we get to spend some time practicing some of our emergency operating skills.

This year, as last, Dick Sandberg, N9SXJ, is our FIELD DAY Chairperson. So send him a note and let him know what you can do to help with FIELD DAY.

I've listened to the radio a bit during the last few weeks, and I hear a good number of new hams on the air. If you are listening, take a few minutes to welcome these folks to Amateur Radio in Gwinnett County. Invite them to a club meeting, inform them of GARS Field Day and all the other fun stuff we do during the year.

I'm taking the CERT training. Community Emergency Response Team, training is great way to learn how to respond to a mass casualty situation in your local community. The sessions have been interesting and informative. Our own Dave Adanich, W8WDJ, is one of the group leaders and has been great at making sure all the trainees are kept up to date with materials and itinerary. If you have the opportunity, I highly recommend taking the CERT classes.

Our net check-in rate remains fairly high, and I want to thank all of those net operators and alternate operators for making the commitment to GARS. Check in often. Volunteer to be a net control or alternate net control

After attending an ARES test deployment a few weeks past, I decided I needed a better 2mtr portable antenna. I built the one by Ed Fong, WB6IQN, who won the March *QST* Cover Plaque Award (Apr 2, 2007) -- for the article "[The DBJ-2: A Portable VHF-UHF Roll-Up J-Pole Antenna for Public Service](#)." A neat little antenna.

After building one following his directions, I also ordered one from him. His is a lot neater than mine.

73 es hp to cu agn sn de Norm, WA4ZXV

The GARZETTE

*The GARZETTE* is the official monthly organ of the Gwinnett Amateur Radio Society serving its members and other persons interested in the advancement of the amateur radio art.

Original articles, art, and photos are invited and encouraged. Previously copyrighted submissions cannot be accepted for reprinting unless permission from the appropriate publisher is provided in writing along with the information being submitted. If reprints are from publications allowing their unrestricted use, please include a copy of the printed permission contained in the publication.

If possible, bring your articles to the monthly meeting in Microsoft Word format or email to [ka4kkf@arrl.net](mailto:ka4kkf@arrl.net). Artwork can be accepted in most any graphics format and can be submitted via email to the same address. Alternate means of submittal can be arranged when necessary. In keeping with the amateur radio spirit, permission is hereby granted for the reproduction of *The GARZETTE* articles by other amateur radio club newsletters provided that proper credit is given to the individual author and to *The GARZETTE*.

## GARS Recurring Calendar

- Monthly club meeting is the 2nd Tuesday of the month at 7:30 PM. Check the Web Site for Location.
  - Every Monday at 8 PM local time: GARS Want, Swap, Sell, and Information Net on the GARS 2 meter repeater
  - Every Wednesday at 9 PM local time: GARS 6 meter net on the GARS 6 meter repeater
  - Every Saturday at 7:30 AM local time: GARS Weekly Family Breakfast, Golden Corral Restaurant, Riverside Drive, Lawrenceville
  - 20th of each month: Deadline for submittal of articles for the following month's GARZETTE

## **General Meetings**

**April 10**      **September 11**

**May 8**                    **October 9**

**June 12**      **November 13**

July 10

August 14

We are on the internet

Check out our web page at  
[Http://www.gars.org](http://www.gars.org)

You can find the latest news and information about the club

You can also find the GARZETTE. The home page has a link to add you to the GARS mail list at Yahoo groups.

The GARZETTE is published each month with the assistance of Hal Manning, who prints the news letter. Rick Patchin, KD4RFK does the final production work on The GARZETTE by folding & labeling. Bill Cherepay, WB4WTN, stamps and gets the end product to the Post Office each month. Norm Schklar, wa4zv, manages email delivery. Many thanks to each of them and all article contributors.

Deadline for submissions is the 20th of each month for inclusion in the following month's issue.

**March GARS General Meeting****March 13, 2007**

In the absence of the president, Norm Schklar, WA4ZXV, Randy Collins, N4COR opened the meeting.

Introductions were made and three first time guests were recognized.

Dave Bruse, W4DTR, (Program Manager) presented a mini program consisting of a display and explanation of the new MFJ Weather-Proof Antenna Feedthrough Panel.

Dave then introduced Mike Swiderski, K4HBI, who gave a very interesting and informative program on trouble-shooting and remained available during the break for additional questions.

Break – Venture Crew 73 announced that they had Scout Blast Cards for sale.

The minutes from the February meeting were approved without correction.

The Treasurer's report was presented by Amy Woodrick, KE4IFK, and was accepted without correction.

**Reports:**

Membership – 1 new member was presented and voted into full membership:

Paul Kelley, WK4KK, Advanced Class was welcomed back.

Program Manager – The April meeting program will be the American Red Cross Disaster Action Teams (DAT).

Earl Whatley, AF4FG, Vice President, reported on the Scout Spring Fling on March 17 at Scout Land at Lake Lanier. This is an event for Cub Scouts and Webelos, and operators are needed.

Bob Pursley, WD4KQQ, and Vester Scott, N8EKA, were recognized for their work as communicators with the Georgia Baptist Disaster Relief effort in Americus, Georgia, the previous week.

Door prizes were awarded.

Adjourned: The meeting was adjourned at 9:20 pm.

Prepared by Randy Collins, secretary

# "It's Good to be General"

George S. Patton

By KI4MEH

I passed my general (thank you Win N1TWX). I know. That makes me "a" general not "the" general, and I'm not sure Patton ever said that or if it was just one of those things everyone thinks he said.

The funny thing is I never started out to be a Ham. I had a communication need and amateur radio seemed to be the best solution. The problem was I knew less than nothing about amateur radio. So I sought out those who knew what I wanted to know, and that brought me to GARS. There I learned about ARES and also joined them to increase my learning opportunity.

I found the knowledge I was after, but I expected that. What I did not expect were the people that I found. They are the largest collection of the most unique individuals I've ever encountered in fact or fiction, a cast of characters that would leave Dickens humbled by his lack of imagination. For the most part they are drawn together by two things, an enjoyment of amateur radio, and a desire to do good for others.

At first glance they seem an ordinary enough group, even if more than a little heavy on the engineering side. But upon closer examination I found that in some way each one had combined their preoccupation with amateur radio with sharing with others. I find that desire to share extraordinary in today's world.

There are those that give their time to emergency communication, scouting, supporting our military personnel, teaching kids, teaching new hams, helping with community events, working the dog show (the main fund raiser), club officers, committee members, and advancing the ham community in general, an almost endless list of Elmer's and the two best fathers I have ever seen. Almost everyone is contributing in one-way or another.

Even the Saturday morning breakfast club (a group heavy on ..well .. the heavy side, including me) exchange circuit diagrams and antenna designs on napkins while fielding questions from the new guy and keeping in touch with old members long departed on Echo Link.

I miss the breakfast club (on advice from my doctor). And I don't miss anything. I didn't even miss Maverick when it was canceled (the real one with James Garner, .... ok I missed it a little). After I lose about 60 pounds I may get to go back to the breakfast club. I even miss Ron WE5O and I only met him about three times before he moved.

But hey, IT'S GOOD to be General.

And with the HF nets that the clubs are starting (including GARS) we can reach out and find old friends again and make new ones.

And THAT's what amateur radio is all about.

Look at me ..... I turned into a Ham.

NASA Space shuttle veteran and International Space Station Expedition 12 commander Bill McArthur, KC5ACR, will be the League's guest at Dayton Hamvention <<http://www.hamvention.org>> 2007 in May. Hamvention takes place this year Friday through Sunday, May 18-20, at Hara Arena near Dayton, Ohio. The first astronaut to work all states from space, McArthur has been applauded for inspiring others through his ham radio activities from NA1SS.

He'll be featured speaker during a closed ARRL reception Thursday, May 17, and will be on hand all day Friday, May 18, to greet and talk with visitors to ARRL EXPO 2007 at Hamvention <<http://www.arrl.org/announce/nc/2007/>>.

ARRL also anticipates that McArthur will be able to lead an Amateur Radio on the International Space Station (ARISS) forum at Dayton Hamvention for first-day visitors.

A showcase of exhibits and activities aimed at enhancing your ham radio and Dayton Hamvention experience, ARRL EXPO will take place in the Ballarena of Hara Arena. Open to members and nonmembers, ARRL EXPO will display a sampling of what the League has to offer, including mini-forums on various topics and a Youth Lounge. The ARRL retail counter will be stocked with popular publications and products, and visitors can join or renew ARRL while there.

A graduate of the US Military Academy at West Point, McArthur, 55, holds a master's degree in aerospace engineering from Georgia Tech. As the keynote speaker at the 2006 AMSAT Space Symposium banquet and participant in the ARISS International conference last October in the San Francisco Bay area, McArthur enjoyed the opportunity to meet many radio amateurs during his stay, including some he'd worked from NA1SS.

During his six months aboard the ISS -- from October 2005 until April 2006 -- McArthur became the most active ham-astronaut ever to serve in space, logging more than 1800 QSOs and picking up several honorary operating awards, including Worked All States (WAS) and Worked All Continents (WAC). He told his AMSAT audience last fall that the tremendous enthusiasm of the radio amateurs and students he talked with via ham radio helped him to focus on why he was aboard the ISS.

Over the course of his ISS duty tour, McArthur, a veteran of four spaceflights and spacewalks, also established an impressive new milestone of 37 ARISS school contacts. In addition, he put 130 DXCC entities into the NA1SS log and is continuing to collect the necessary QSL cards to qualify for an honorary DXCC.

While in space, McArthur managed to contact all continents, including Antarctica, on both VHF and UHF. He and Expedition 12 Flight Engineer Valery Tokarev also released SuitSat-1 into orbit. An astronaut since 1990, McArthur now serves as safety and mission assurance manager for the shuttle program at Johnson Space Center.

#### ==>SUNI WILLIAMS, KD5PLB, A BRIGHT, CHEERY VOICE FROM SPACE

An upbeat Suni Williams, KD5PLB, continues to delight students with her unfailingly enthusiastic responses to their questions about life aboard the International Space Station. The Expedition 14 Flight Engineer doesn't even seem to mind when the question is one she's already heard several times already from other youngsters. ISS crew members, many of whom hold Amateur Radio licenses, take time out of their off-work hours to speak with students as part of the educational outreach. During a contact March 16 with students at University School in Shaker Heights, Ohio, Williams talked about some of the things she's missing in space.

"Of course, I miss my dog, and I've talked about that already," Williams told students at the private boys' school near Cleveland, "but secondly, I just miss having a cup of whatever -- milk or coffee or something you can take an Oreo and dunk it into. Just drinking out of a normal cup, rather than drinking out of a bag and a straw, is something that I really miss."

What Williams enjoys, among other activities, is being able to float in microgravity. "It's better than it looks," she told one questioner. Scheduled to remain aboard the ISS until this summer, Williams said there's always something to do aboard the ISS. "It's hard to get bored up here," she allowed. She said she's enjoying taking photos of Earth, enjoying the view from space and keeping in touch with her family and friends via e-mail.

Bob Morgan, K8RBV, loaned his call sign and served as control operator for the direct VHF contact with NA1SS. The Shaker Heights school has a full-size space shuttle simulator that includes the flight and mid-decks of the transporter, as well as a mission control area and a module of the ISS.

On March 19, she chatted about life aboard the space outpost with grade 6-8 students at East Aurora (NY) Middle School. Youngsters there were interested in any precautions the ISS crew took in the event of a solar storm.

"If there are solar storms that are going to have a big effect on us, we will go to a part of the space station that's a little bit more protected -- some of the node areas that have different modules on different sides that would be a little more protected," Williams explained. "And that's tracked on the ground and predictions are made, and they will give us enough time so we'll be able to take cover as needed." Responding to another question, Williams noted that a "solar wind" can actually change the attitude of the ISS.

George "Buff" Hoffman, a retired US Air Force officer whom Williams knows, addressed the students prior to the event. Hoffman's son, Sam, attends the school and took part in the contact. "It was great to hear her voice, and the connection was superb," LTC Hoffman said afterward. "Kudos to ARISS."

Gerald Klatzko, ZS6BTD, in South Africa, served as the Earth station for the East Aurora contact. A Verizon Conferencing teleconferencing link provided two-way audio between ZS6BTD and the school. The event attracted media attention from three TV stations and one newspaper.

ARISS is an international educational outreach with US participation by ARRL, AMSAT and NASA.

**GARS Specialist  
Top Negotiator  
Top Agent**

Helping "HAMS" with the Sale and Purchase of their properties takes Extra Time, Effort and Dedication. Not every agent is willing to make that Commitment.

Call me for when You or Your Friends and Family are ready to Make a Move.
